GENOMICS LABORATORY REPORT

Next-Generation Sequencing & Clinical Bioinformatic Evaluation
Accredited ISO-15189 / CLIA High-Complexity Laboratory

ID: REP-2026-0001
Status: DELIVERED
Date: Oct 26, 2026

1. REQUISITION & INVESTIGATOR INFORMATION

Requester Name:	Dr. Alexander Hayes	**Requisition Title:**	Glioblastoma Multiforme Somatic Exome Profiling
Organization / Dept:	Dept. of Oncology Research	**Sample Type:**	Tissue
Request Code:	REQ-2026-0001	**Priority Level:**	URGENT

2. SPECIMEN IDENTIFICATION & QUALITY METRICS

Sample Barcode:	SMP-2026-0001
Collection Date:	10/8/2026
Received Date:	12/8/2026

QC PARAMETER	MEASURED VALUE	QC STATUS
Fluorometric Conc.:	62.4 ng/µL	**PASS**
Purity A260/280 & 230:	1.84 / 2.12	RIN/DIN: 8.9

3. SEQUENCING RUN SPECIFICATIONS

Run Code:	RUN-2026-0001	**Run Assay Type:**	WES
Platform / Chemistry:	Illumina NovaSeq	**Read Configuration:**	2x150bp
Target Coverage:	100x target depth	**Execution Status:**	COMPLETED

4. BIOINFORMATICS PIPELINE & INTERPRETATION SUMMARY

Pipeline: BWA-MEM + GATK HaplotypeCaller + Mutect2

Reference Assembly: GRCh38

Executive Findings & Summary:

Identified pathogenic somatic variant in TP53 c.818G>A (p.Arg273His) at 42.1% VAF. High microsatellite stability (MSS).

5. LABORATORY CERTIFICATION & SIGN-OFF

This test was developed and its performance characteristics determined by the Genomics Laboratory. It has been validated in accordance with laboratory accreditation standards for research and clinical oversight.

VERIFIED BY (LAB STAFF):
Sarah Lin, M.S.
Date: 2026-10-26

APPROVED BY (LAB DIRECTOR):
Laboratory Medical Director, Ph.D., FACMG
Electronic Signature Verification: PASSED
